Rotary Club of Hong Kong South: 『Hong Kong Global Geopark of China』 Talk
香港島南扶輪社: 『中國香港世界地質公園』 講座
(30/08/ 2012)

Mr. LO Wing-sun was invited by the Rotary Club of Hong Kong South to give a talk on 『Hong Kong Global Geopark of China』. In the midst of the recent announcement of the High Island super caldera by CEDD, the luncheon talk attracted an unusual attendance and even one senior project manager from another Chapter! Mr. LO elaborated on the setting up of the geopark system which is exactly meant for the conservation of the rare geo wonders of the High Island super caldera and the other geoheritages in Hong Kong and also how the system works for the popularisation of earth sciences. He also explained the many existing and upcoming threats to this Geopark in particular the already EIA approved CLP wind farm project to the ESE of the Sai Kung Peninsula. That raised a lot of heat and concern for our geopark's future from the participants.

本會幹事羅榮新先生應香港島南扶輪社邀請發表午餐演說，講題為『中國香港世界地質公園』。由於土木工程拓展署最近公佈在西貢糧船灣發現超級破火山，是次演說吸引了異常多人出席，甚至鄰社的一位高級工程師！羅先生詳述建立地質公園正是要保育香港這罕有的超級破火山和其他珍貴的地質地貌遺產；地質公園更助推廣地球科學。他指出地質公園亦面對多項威脅，如在西貢半島對開已通過環評的中電風電場計劃，引發了與會者對地質公園的前景的關注及提問。
