

Using Geoheritage to Promote Geotourism and Earth Science: The Vulkaneifel UNESCO Global Geopark Experience

Maar Lake and Tuff Ring of Vulkaneifel UNESCO Global Geopark 埃菲爾山脈聯合國教科文組織世界地質公園的瑪珥湖和凝灰環

Situated in the western part of Germany, Vulkaneifel UNESCO Global Geopark is the wonderland of volcanic landscape. In just 1,000 sq km, there are approximately 350 volcanoes of various sizes, 75 maars-lakes, lava flows and countless mineral and carbonated springs revealing the geological history of the last 400 million years.

The park has 5 geo-museums making these scientific phenomena accessible to all. Visitors can also find certified guided tours that invite them to enjoy the walking, hiking, cycling and mountain biking to explore and uncover this multifaceted land of crater lakes and volcanoes.

We are delighted to invite Dr. Peter Bitschene, Director of Gerolstein Museum of Natural History and Tourism and Economic Promotion Board of Gerolstein County, Vulkaneifel to share with us the experience of using geoheritage for edutainment.
