

香港地貌岩石保育協會
Association for Geoconservation, Hong Kong

People enjoy going to countryside to breathe fresh air, to reduce stress and to relax.

While visiting the countryside, many might neglect environmental hygiene and personal safety. They litter and/or climb the rocks and steep cliffs, even the Hong Kong Geopark landmark.

Our Association together with Geo-tourism Development Group, Association for Sha Tau Kok Culture and Ecology, Recommend Geopark Guides (R2G) while supported by Agriculture Fisheries and Conservation Department, Hong Kong Geopark, R2G tours operators and various shipping companies join hands to promote 'Treasure Our Life and Conserve Our Nature' to arouse public awareness.

Please support

Treasure Our Life No Climbing
Conserve Our Nature No Littering
