

香港地貌岩石保育協會
Association for Geoconservation, Hong Kong

AGHK strongly protests any developments destroying our geology, landscapes and ecology. We sternly demand the Government to immediately:-

1. outline Sai Wan as conservation area to stop the development
2. forbid any continuation of development that pollute our environment and destruct our invaluable sensitive geological areas
3. set up a coordinating department to comprehensively review the conservation, planning, lands and execution policies so as to cover existing loopholes that destruct the areas within and or in the proximity of country parks and or other areas
4. demand Lands Department to strengthen its control, to expeditiously enforce and prosecute
5. restrict construction machineries and building material entering into or bypassing Country Parks
- 6 increase the penalty for offences against The Country Parks and Special Areas Regulation(208A).

PROTECT SAI WAN CHERISH ROCKS AND LANDSCAPES
