現時在大自然保護中缺少的一環：有關香港地質保護的討論以及將來

The missing link in nature conservation:

a discussion on geological conservation and its future in Hong Kong

香港礦物學會 (The Mineralogy Society of Hong Kong)

(24/9/2008)

香港礦物學會誠邀本會吳振揚主席主持講座，名為「現時在大自然保護中缺少的一環：有關香港地質保護的討論以及將來」。

該會是新成立不久，出席的人數不算多，而且大多是年青人，當講座完後，主席可以跟各人輕輕鬆鬆的討論。

講座是希望該會會員認識為何要保護地質及地貌，又介紹本會的工作及關注的問題。講座後所討論的問題，又關切到他們學會的主題「搜集礦物」。經過大家熱烈討論後，學會明白了我們為何想訂立守則以保護香港的地質地貌，我們又了解到學會不會因為興趣搜集礦物而破壞珍貴的地質，相方交換不少意見。

Mr. Young Ng, Chairman of AGHK, was invited to held a talk for The Mineralogy Society of Hong Kong. The theme was “The missing link in nature conservation: a discussion on geological conservation and its future in Hong Kong”.

This Society is a newly formed. Although the attendants were not so many & mainly youth, there was a happy discussion.

We hope the members of the MSHK could understand why there was a geoconservation for Hong Kong in the talk. Mr. Ng also introduced AGHK works & the concerns to them. After the talk, we discussed about their interest – collecting mineral. The MSHK understood why we wanted to set some rules to protect Hong Kong geo. AGHK also understood the MSHK would not distort the Hong Kong geo for their interest. This is a good experience for both to exchange the views.
